I have been working with a team of whistleblowers to take back our Republic, and wanted to give you a status update. I just got off the phone with Mr. Jerry McNeil, who has documented, through painstaking and meticulous research, how unscrupulous lawyers hid from us what they were doing. President Woodrow Wilson's advisor Edward Mandell House was the son of a gun runner during the Civil War, and a chief architect of the banking cabal plot.

In 1937 the states agreed to take away our property rights through an act that was never approved by Congress, but written into the book of states.

Many lawyers remain in the dark about the actual legal situation.)

Our remaining rights were stripped from us in 1948

I have published a piece of Mr. McNeil's research in a comment on the internet at:

These fusion centers are simply administering the War Powers which the US Congress has continued (behind closed doors) . But now that we the people have found out this legal travesty, it is going to be dismantled in short order. The lawyers of the world are on notice -- either you are part of the solution, or your legal profession is going to go the way of the dinosaurs.
